

AUDIO/VIDEO SOLUTIONS

High definition digital audio and video are the core of today's entertainment and PC systems. High definition technology demands precision-crafted components to ensure ultimate performance.

Cables To Go™ has the connectivity solutions needed to support cutting-edge technologies by offering HDMI™, DVI, component video, Toslink®, digital coax and analogue A/V cables.

In addition to A/V cables, Cables To Go has a full line of A/V adapters, couplers and splitters. We also carry a full range of RCA audio and video cables, as well as S-Video cables and adapters; perfect for replacing the inferior cables that come with your new device.

AUDIO/VIDEO SOLUTIONS

Velocity™ High-Speed HDMI™ Cables

80331

Digital high definition audio/video with no signal degradation

Velocity HDMI Cables from Cables To Go deliver a strong combination of performance and value. Enjoy high resolution digital video and true digital audio delivered together in one convenient, compact connection. High quality materials and construction ensure a lifetime of dependable performance. These fully-functional, high-bandwidth cables are tested to perform at industry standards and are backed by a lifetime warranty.

- High performance home cinema cable for high definition DVD players, HDTV receivers, TV sets, projectors and other HDMI-equipped devices
- Fully-shielded conductors provide complete immunity to EMI/RFI interference
- 24k gold-plated connectors ensure superior signal transfer
- Connectors: HDMI Male to HDMI Male
- HDMI (v1.3 with Deep Colour, x.v.Colour, Dolby® True HD, and DTS-HD Master Audio)
- Full 1080p resolution
- Lossless multichannel digital audio for full 7.1 surround sound
- High bandwidth (340MHz /10.2Gbps) for high-speed data transfer
- Certified to perform at standards set by HDMI
- HDMI-CEC system control compatibility
- Lifetime warranty

Item#	Description	RRP
80331	1m Velocity High-Speed HDMI Cable	£21.99
80332	2m Velocity High-Speed HDMI Cable	£24.99

80334	5m Velocity High-Speed HDMI Cable	£37.99

Velocity™ HDMI™ To DVI Digital Video Cables

80339

Full 1080p high definition digital video with no signal degradation

Velocity HDMI To DVI Cables from Cables To Go deliver a strong combination of performance and value. They display high resolution digital video from an HDMI equipped device to a DVI equipped device, or vice versa. High quality materials and construction ensure a lifetime of dependable performance. These fully-functional, high-bandwidth cables are tested to perform at industry standards and are backed by a lifetime warranty.

- High performance home cinema cable for high definition DVD players, HDTV receivers, TV sets, projectors and other HDMI-equipped devices
- Fully-shielded conductors provide complete immunity to EMI/RFI interference
- 24k gold-plated connectors ensure superior signal transfer
- Connectors: HDMI Male to DVI Male
- Certified to perform at standards set by HDMI
- Full 1080p resolution
- High-bandwidth conductor (10.2Gbps) for high-speed data transfer
- Lifetime warranty

Velocity™ HDMI™ And DVI Inline Adapters

80345

Convert an HDMI cable to a DVI connection or vice versa for your audio/video system

The HDMI And DVI Adapters from Cables To Go provide a pure digital, high definition video connection! You'll see the purity of the original signal with absolutely no picture degradation. These cables are fully tested and absolutely guaranteed.

- Pure digital connection with no signal degradation
- Ideal for Satellite, DVD, HDTV, Plasma, LCD and DLP
- Gold-plated contacts for worry-free performance
- Lifetime warranty

Velocity™ Component Video Cables

80176

Connect progressive scan video components to monitors and other devices

Velocity Component Video Cables by Cables To Go are ideal for connecting progressive scan video components to monitors and televisions. Improve the performance of your progressive scan video sources by replacing the throw away cables that come with the equipment with superior component cables. The dual braided, oxygen-free copper shield and aluminium foil sheath offer protection from environmental noise and interference.

- Bonded cable construction provides neat and easy component video connections
- Colour-coded moulded connectors for easy installation
- UL listed
- Connectors: RCA Plug x3 to RCA Plug x3
- Oxygen-free copper conductors for efficient signal transmission
- 100% aluminium foil and braided OFC shield
- Moulded connectors feature precision-made 24k gold-plated contacts

AUDIO/VIDEO SOLUTIONS

Product Line Comparison

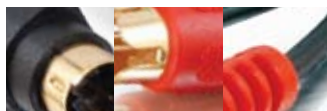

Velocity™

The Velocity series of audio/video cables and bulk speaker wire provides excellent signal integrity for today's A/V enthusiast. These modestly priced, high-performance cables provide a stunning depth of sight and sound when tested against other comparably priced audio/video cables. Twisted pair oxygen-free copper (OFC) wire and rubberized silicone or foam polyethylene dielectric provide optimized audio clarity and imagery. The low-loss, 100% Mylar® foil and braid shielding offers superior protection against noise and interference. The colour-coded moulded connectors attach to a UL-listed blue jacket allowing for easy installation and channel/function identification. The 24k gold-plated contacts ensure a corrosion free interface for long lasting, sonic quality free from distortion.

Value Series

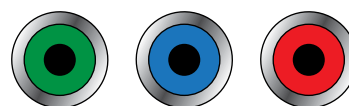

The Value Series of cables and bulk cabling from Cables To Go delivers high signal clarity of picture and sound geared toward the cost-conscious consumer. Connector contact points are gold-plated to create an oxidation resistant barrier. The PVC overmould is colour-coded to indicate video or stereo channels and is flexible to provide excellent strain relief. The UL-listed wire is 99.9% pure, 24-28AWG copper wrapped in a black PVC jacket. The 100% foil/60% braided shield (for the interconnects only) ensures accurate sound reproduction and guards against the negative effects of EMI/RFI. Spiral-wrapped, copper shielding and foam polyethylene are used where applicable to provide solid imaging. We demonstrate our absolute confidence in this full-function product line by offering a lifetime warranty. The Value Series provides clear sight and sound for less.

Connector Reference Guide

Component Video

Component Video is an analogue format based on a 3-wire construction with RCA-type connectors. Video is transported full bandwidth as a luminance signal and two chrominance signals. Well-suited for multiple applications. This is a versatile interface that supports image quality up to 1080i.

Component

Composite Video

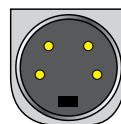

Composite Video is a 75-Ohm interface, and carries both luminance and chrominance information on a single coaxial cable. Durable and inexpensive, Composite Video has maximum resolution of about 400 lines.

Composite

S-Video

S-Video is a dual-conductor format that delivers the luminance signal on one conductor and the chrominance signal on another. Digital video signals will look better using an S-Video interface.

S-Video

Digital Audio - Coax

Digital Audio - Coax

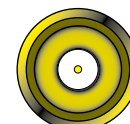

Coax, is a copper coaxial style cable optimised for a delicate digital data stream.

Digital Audio - Toslink™

Fibre optic cables use light to deliver the digital signal, eliminating the risk of signal interference.

Digital Audio - Toslink

RF

RF Format

RF technology is commonly used as the backbone for digital cable and DSS. A digital signal that contains both the audio and video is sent down the cable into the settop box. From there the signal, which may be analogue or digital, is fed into the display device.

Analogue Audio

Analogue Audio cables provide uncompromised audio clarity for stereo reproduction. The solid core longgrain copper results in lower distortion and higher quality. Connect the red and white RCA connectors to the corresponding colored audio input jacks of your HDTV monitor or control box.

Analogue Audio

Connector Reference Guide

HDMI™

Developed by Sony, Hitachi, Thomson (RCA), Philips, Matsushita (Panasonic), Toshiba and Silicon Image, HDMI was created as a digital interface standard for the consumer electronics market. The HDMI protocol combines high definition video, multichannel audio, and inter-component control in a single, digital interface. This cable has the ability to transmit uncompressed digital video from source to display. Even more, the HDMI connection enables audio/video components to share data and commands, thus unifying an oft-disjointed collection of boxes into a functional, working system. HDMI is also fully compatible with computers and display devices, incorporating the Digital Visual Interface (DVI) standard.

HDMI

DisplayPort

DisplayPort

DisplayPort is an interface technology that is designed to connect high-graphics capable PCs and displays as well as home theater equipment and displays. Like HDMI and DVI, DisplayPort utilises TMDS link technology to send high-bandwidth video and audio signals. The 20-Pin connector allows the contact point to send maximum data rates of 8.64Gbps plus 1Mbps for its AUX channel which can carry additional data.

DVI

DVI

The DVI connection was designed as a replacement for the P&D (Plug and Display) standard, itself an upgrade from the digital-only DFP format. Designed primarily to connect a computer to an LCD flat panel monitor, DVI has found applications in advanced consumer electronics image devices where it is used to deliver digital video from a source to a display.

DVI-A

DVI-A

The "A" in DVI-A stands for analogue. DVI-A is seldom encountered in the multimedia realm. Therefore, we do not offer a DVI-A cable.

DVI-D

DVI-D

Digital video at last! DVI-D transfers uncompressed digital video in its native format between components. DVI-D precludes the typical digital-to analogue/analogue-to-digital conversions between a computer's video card and monitor and provides higher quality and faster interface.

Note: DVI-D cannot be adapted to VGA. Contact your Cables To Go Representative for assistance.

DVI-I

DVI-I

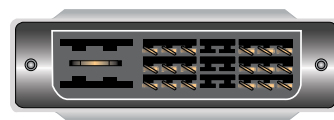

Combine DVI-D and DVI-A on the same cable and you get DVH. The "I" stands for integrated. DVH does not convert a DVI-D to a DVI-A, or vice versa. It simply enables all 29 pins to conduct so that the cable is dual use. It wouldn't be uncommon for a manufacturer to use a DVH connector as the receptacle to allow for the use of both DVH and DVI-D cables, even if the analog transmission ability is never used.

Dual Link

DVI Single Link Or DVI Dual Link

DVI uses a digital information format called Transition Minimised Differential Signaling (TMDS). Single link cables use one TMDS transmitter, while dual link cables use two. A single link DVI connection supports a 1920 x 1080p image at 60fps. In the context of an audio/video theatre system, DVI-D Single Link is 1080p compatible. HDMI uses a DVI-D video transport system, so HDMI is also 1080p compatible. A dual link connection supports up to a 2048 x 1536 image. The digital interface uses 24 of the possible 29 pins found on a DVH cable. A single link DVI cable enables 12 of those 24 digital pins and dual link configuration enables all 24. For audio/video applications, a single link cable is the correct choice.

Single Link

Note: HDMI, the HDMI logo and High-Definition Multimedia Interface are trademarks or registered trademarks of HDMI licensing LLC.

AUDIO/VIDEO SOLUTIONS

Velocity™ Component Video/RCA-Type Audio Combination Cables

80251

Connect component video and stereo audio with a single cable

Velocity Component Video Cables from Cables To Go are perfect for connecting component video and stereo audio with a single cable. These cables provides improved picture and sound quality when compared to throw away from the box cables that come with the equipment.

- Bonded construction design for neat, easy connection of component video and stereo audio
- Fully moulded connectors provide excellent strain relief
- Aluminium foil and oxygen-free copper braid shield provide clear, noise-free, vivid picture quality
- Colour-coded moulded connectors attach to an ultra-flexible jacket and allow for easy installation and identification
- Connectors: RCA Plug x5 to RCA Plug x5
- 75-Ohm oxygen-free copper centre conductors
- 24k gold-plated connectors
- Twisted-pair construction in the audio conductors

Value Series Component Video Cables

80010

Provides video signal transfer between a DVD player and a TV or projector

Component Video Cables from Cables To Go are designed for connecting high definition DVD players and high-end televisions. These cost-conscious cables are high quality and deliver a crisp, clear picture for less. Component video cables are able to bypass the TV's Y/C separator and colour decoder, routing the colour (Y/Pr/Pb) information directly into the TV's matrix decoder. By sending the pure DVD component video signal directly to a component video input-equipped display device, the DVD signal forgoes the extra processing that would normally degrade the image. The result is increased image quality, with lifelike colours and crisp detail.

- Ultra-flexible jacket for easy installation
- Colour-coded, fully-moulded connectors provide excellent strain relief
- Connectors: RCA Plug x3 to RCA Plug x3
- Nickel-plated connectors
- Colour-coded connectors: Red, green, blue

Velocity™ S-Video Cables

80150

Connect Hi-8, SVHS and extended bandwidth PVR products to your home cinema system

Velocity S-Video Cables from Cables To Go provide the perfect solution for connecting extended definition video recorders or digital satellite systems to your audio/video receiver or television/monitor. Carefully designed dual 75-Ohm precision video conductors ensure optimal video quality. These cost-effective high performance cables ensure maximum video quality when compared with S-Video cables typically included with consumer electronics products. In addition to fitting standard 4-Pin S-Video jacks, Velocity S-Video cables fits most 7-Pin jacks found on desktop and notebook PC's with a TV out jack.

- Fully moulded connectors provide excellent strain relief
- Ultra-flexible PVC jacket for easy installation
- Individually shielded
- Y (luminance) and C (chrominance) conductors are combined with an overall aluminium foil and OFC braid shield to protect against radio frequency interference (RFI) and electromagnetic interference (EMI)
- Connectors: 4-Pin DIN Male to 4-Pin DIN Male
- Oxygen-free copper wire construction
- 24k gold-plated connectors
- Individually double-shielded 75-Ohm coax conductors

Velocity™ S-Video Y-Cable

80316

S-Video splitter for crisp, detailed picture

The Velocity S-Video Y-Cable from Cables To Go is the solution for sending a single S-Video signal to two devices. A dual coax design, this S-Video cable transports the black and white picture detail information and the chrominance colour information on separate pathways. In addition to fitting standard 4-Pin S-Video jacks, the performance S-Video cable fits most 7-Pin jacks found on desktops and notebooks with a TV out jack.

- Oxygen-free copper wire delivers all the detail, colour and brightness you expect from your S-Video components
- Individually double-shielded 75-Ohm coax wires with overall foil and braid shield reduce noise and distortion
- Connectors: 4-Pin Male to (2) 4-Pin Female
- 24k gold-plated connectors

Note: Results may vary with the use of a passive S-Video splitter

Value Series S-Video Cables

80040

Connect S-Video equipped components to your television or monitor

Value Series S-Video Cables by Cables To Go are constructed with separate conductors to carry the Y-component (Chrominance) and the C-component (Luminance), providing better picture quality than a composite video cable. S-Video cables are commonly used for DVD players, satellite receivers, S-VHS VCRs, camcorders and interface with S-Video equipped televisions. S-Video cables also work with most PCs and notebooks with 7-Pin TV out jacks.

Value Series Bi-Directional S-Video To RCA-Type Cables

80067

Converts your composite video signal to S-Video or vice versa

The Bi-Directional S-Video To RCA Cable from Cables To Go are designed to connect S-Video devices to a non-S-Video television. This bi-directional video cables convert composite RCA to S-Video or vice-versa without the expense of high priced active converters. In addition to fitting standard S-Video jacks, these precision engineered, bi-directional cables fit both 7-Pin and 4-Pin jacks on desktops and notebooks with a TV out jack.

- Connect your laptop, PC or game console to the TV
- Fits both 7-Pin and 4-Pin jacks on laptops
- PVC flexible jacket for easy installation
- Connectors: RCA Plug to S-Video Plug
- Quality 75-Ohm aluminium foil and braid shielded coaxial cable
- Gold terminals
- NTSC and PAL compatible
- Colour-coded connectors: Yellow

Value Series S-Video + Audio To (3) RCA-Type Adapter Cables

80084

Connect your S-Video/audio out on your PC to composite RCA on TV or receiver

The S-Video + Audio To 3 RCA Adapter Cables from Cables To Go allows you to connect your multimedia PC to your television with ease. These precision-engineered adapter cables connect the S-Video out of your computer to a TV. This bi-directional cable converts S-Video to composite RCA or vice-versa without an expensive active converter. In addition to fitting standard S-Video jacks, the cable fits both 7-Pin and 4-Pin jacks on desktops and notebooks with a TV out jack

- Convert from composite S-Video to RCA or vice-versa
- Fully moulded connectors provide excellent strain relief
- PVC flexible jacket for easy installation
- Y/C signal separation circuitry provides a bright, crisp picture
- Portable lightweight design makes it ideal for laptops
- Connectors: S-Video Male and 3.5mm Plug to 3 RCA Plug
- Gold terminals
- High quality 75-Ohm aluminium foil and braid shielded coaxial cable
- 24AWG 90% spiral-wrapped copper shielded wire
- Colour-coded connectors: Yellow, green, red, white

AUDIO/VIDEO SOLUTIONS

Value Series S-Video/RCA-Type Audio Cables

80050

3-in-1 cable: S-Video and Dual RCA for home cinemas

S-Video/RCA Cables from Cables To Go are designed for connecting your VCR, DVD, TV and other audio/video equipment to your TV or receiver. The dual coax design carries the Video (Y) signal separate from the Colour (C) providing higher resolution and better picture quality. These S-Video/RCA cables deliver all the detail, colour and brightness you expect from your audio/video equipment.

- Combines S-Video and RCA in a single cable design
- Fully moulded connectors provide excellent strain relief, keep your cable intact
- Added flexibility and durability from PVC jacket
- Connectors: 4-Pin Plug/RCA Plug x2 to 4-Pin Plug/RCA Plug x2
- Gold-plated terminals
- Individually double-shielded 75-Ohm coax with foil and braid shield

Velocity™ RCA-Type Video Cables

80163

Connect any VCR, laser disc player, camcorder or other video source to your audio/video receiver or monitor

Velocity RCA Video Cables from Cables To Go connect a VCR, laser disc player, camcorder, or other video source to your television. These cables ensure vivid picture quality and maximum detail from your composite video sources. The low-loss 75-Ohm oxygen-free copper conductor and foamed PE dielectric maintain proper characteristic impedance, and guarantee that you will experience all the picture quality and performance your equipment can deliver.

- Fully moulded connectors provide excellent strain relief
- Connectors: RCA Male Plug to RCA Male Plug
- Oxygen-free copper centre conductor
- 24k gold-plated contacts
- Oxygen-free copper braided shield fights RFI and EMI

AUDIO/VIDEO SOLUTIONS

Velocity™ RCA-Type Audio/Video Combo Extension Cables

80202

Extend the reach of your audio/video equipment

Velocity RCA audio/video Cables from Cables To Go offer excellent sound and picture quality over longer distances. These cost-effective, high performance cables give your installation the extra reach needed to make the right connection. Use these cables to extend existing cables, or replace shorter cables. Twisted-pair oxygen-free copper wire and a foamed PE dielectric ensure quality audio performance. A low-loss 100% foil and spiral-wound, oxygen-free copper shielding provide protection against noise and interference.

- Bonded construction design for neat, easy connection of audio/video
- Twisted-pair oxygen-free copper wire and a foamed PE dielectric ensure quality audio performance
- Colour-coded moulded connectors attach to an ultra-flexible jacket, and allow for easy installation and identification
- Connectors: RCA Plug x3 to RCA Jack x3
- Oxygen-free copper centre conductor
- Corrosion-resistant, precision-made 24k gold-plated connectors
- Low-loss 100% foil and spiral-wound oxygen-free copper shielding

Velocity™ Camcorder Audio/Video Cable

80247

Upgrade the low quality cable that comes with your camcorder

The Velocity Camcorder Audio/Video Cable from Cables To Go offer vivid picture quality and superb sound from your camcorder. This cable connects camcorders to a television, monitor, VCR or audio/video receiver. Camcorder cables that are included with the equipment often use low quality materials with inferior shielding, which can result in poor picture and sound quality. Capture maximum performance from your camcorder with Velocity Camcorder audio/video Cables.

- Colour-coded moulded connectors attach to an ultra-flexible jacket and allows for easy installation and identification
- Fully-moulded connectors provide excellent strain relief
- Tri-bonded construction design for neat, easy connection of video and audio
- Connectors: Mini audio/video Plug to RCA Plug x3
- Low-loss 75-Ohm oxygen-free copper wire and foamed dielectric
- 90% Mylar® foil and spiral wound oxygen-free copper shielding
- Precision quality 24k gold-plated connectors

Velocity™ Toslink Optical Digital Cables

80322

Optical digital audio interface for stereo audio or multichannel surround sound from CD, DVD, satellite receivers and gaming systems

Velocity Digital Optical Toslink Cables from Cables To Go are manufactured from high quality PMMA optical fibre with a polished lens and gold-plated collet to provide an accurate digital signal. The stylish PVC jacket adds flexibility and durability for years of listening pleasure.

- Ultra-flexible PVC jacket makes installation easy
- Protective plastic cover protects lens from dust, dirt and other material
- Optical cables transfer the signal using light; thus completely eliminating any chance for RFI, EMI or ground loop interference
- Non-slip rubber grip connector provides for easy installation
- Connectors: Toslink to Toslink
- Low-Loss MPPA core ensures low distortion

80473	Stereo Audio/Video Coupler - Female To Female.....	£4.99

Stereo Audio Isolation Transformer

80449

Eliminate noise from your audio/video system due to the effects of ground loops

The Ground Loop Isolation Transformer from Cables To Go connects easily into your audio/video system and breaks the ground path through cables between components. Start at the component last installed before the ground loop was discovered and connect the isolation transformer at different ends of the audio/video cable until the ground loop is gone.

- Easy connection using standard audio cables
- Frequency Response: 20 Hz~20 KHz

Item#	Description	RRP
80449	Stereo Audio Isolation Transformer	£49.99

Bi-Directional RCA Male/S-Video Female Video Adapter

80444

Convert from RCA to S-Video or vice-versa

The Bi-Directional RCA To S-Video Adapter from Cables To Go is a low-cost alternative to high priced active converters. This bi-directional video adapter is designed to convert composite RCA to S-Video or vice-versa.

- Convert from composite RCA to S-Video or vice-versa
- Low-cost alternative to high priced active converters
- For high performance video connection from DVD, VCD, laser disc, VCR, camcorder, cable/DSS receiver or multimedia PC to A/V receiver, TV or monitor
- Use between an RCA cable and a S-Video cable
- Connectors: RCA Plug to S-Video Jack
- Y/C signal separation circuitry provides a bright, crisp picture
- Gold terminals ensure long lasting, corrosion-free connections
- Passive construction; no power adapters are required

Item#	Description	RRP
80444	Bi-Directional RCA Male/S-Video Female Video Adapter	£5.99

Bi-Directional S-Video Male/RCA Female Video Adapter

80445

Convert from RCA to S-Video or vice-versa

The Velocity Camcorder Audio/Video Cable from Cables To Go offer vivid picture quality and superb sound from your camcorder. This cable connects camcorders to a television, monitor, VCR or audio/video receiver. Camcorder cables that are included with the equipment often use low quality materials with inferior shielding, which can result in poor picture and sound quality. Capture maximum performance from your camcorder with Velocity Camcorder audio/video Cables.

- Colour-coded moulded connectors attach to an ultra-flexible jacket and allows for easy installation and identification
- Fully-moulded connectors provide excellent strain relief
- Tri-bonded construction design for neat, easy connection of video and audio
- Connectors: Mini audio/video Plug to RCA Plug x3
- Low-loss 75-Ohm oxygen-free copper wire and foamed dielectric
- 90% Mylar® foil and spiral wound oxygen-free copper shielding
- Precision quality 24k gold-plated connectors

Item#	Description	RRP
80445	Bi-Directional S-Video Male/RCA Female Video Adapter	£5.99

Bi-Directional RCA Female/S-Video Female Video Adapter

80446

Convert from RCA to S-Video or vice-versa

The Bi-Directional RCA To S-Video Adapter from Cables To Go is a low-cost alternative to high priced active converters. This bi-directional video adapter is designed to convert composite RCA to S-Video or vice-versa.

- Convert from composite RCA to S-Video or vice-versa
- Low-cost alternative to high priced active converters
- For high performance video connection from DVD, VCD, laser disc, VCR, camcorder, cable/DSS receiver or multimedia PC to A/V receiver, TV or monitor
- Use between a RCA cable and a S-Video cable
- UL listed

AUDIO/VIDEO SOLUTIONS

RCA Female to BNC Male Adapter

80410

Adapt RCA to BNC or the opposite

For users who have existing cables with RCA male connections, this adapter will convert them for use with equipment which has BNC connections. Likewise, you could use these adapters directly on the BNC jacks on something like quad screen sequencers or video monitors so that cables with RCA connectors could be easily used.

- Warranty: Lifetime
- Colour: Gold

Item#	Description	RRP
80410	RCA Female To BNC Male Adapter	£2.99

75-Ohm RCA Video Coupler

80452

Connect together existing RCA video cables

The RCA 75-Ohm Video Coupler from Cables To Go offers excellent picture quality for modern video and home cinema applications. The RCA coupler is constructed with 24k gold plating that provides low-loss signal transfers and resists deterioration. Each package contains one yellow-coded coupler for quick identification.

- Designed for splicing together composite video cables
- Connectors: RCA Female to RCA Female
- Provides cable matched 75-Ohm impedance to deliver accurate picture, resolution and colour
- 24k gold connectors provide maximum corrosion resistance for error-free data transfer
- Colour-coded: Yellow

Item#	Description	RRP
80452	75-Ohm RCA Video Coupler	£3.99

Component Video Coupler - Female To Female

80474

Couples two component video interconnects together

The Component Video Coupler from Cables To Go adapts three Female RCA jacks to three Female RCA jacks. Ideal when you need to connect two component patch cables together to extend lengths.

- Colour-coded for cable identification
- Connectors: Three RCA Female to three RCA Female

Item#	Description	RRP
80474	Component Video Coupler - Female To Female	£5.99

Stereo Audio/S-Video Coupler - Female To Female

80475

Couples two stereo RCA + S-Video cables together

The Audio/S-Video Adapter from Cables To Go adapts an S-Video jack and two RCA jacks to S-Video and two RCA jacks. Ideal when you need to connect S-Video and Audio patch cables together to extend the lengths.

- Connectors: Two RCA Female and one S-Video Female to Two RCA Female and one S-Video Female

Item#	Description	RRP
80475	Stereo Audio/S-Video Coupler - Female To Female.....	£13.99

Gold-Plated S-Video Coupler - Metal Handle

80482

Top quality metal-handled S-Video coupler

This Metal Handled S-Video Coupler from Cables To Go adapts a Female S-Video jack to a Female S-Video jack. The coupler is gold-plated for excellent conductivity and durability. Ideal when you need to couple two S-Video cables to increase length.

- Connector: Gold-plated S-Video

Item#	Description	RRP
80482	Gold-Plated S-Video Coupler - Metal Handle	£5.99

RCA Male To Dual RCA Female Adapter

80476

Adapts a single RCA jack to two RCA jacks

The Dual RCA Adapter from Cables To Go adapts Male RCA plugs to two Female RCA jacks. An Ideal solution for converting mono output from a VCR to stereo input for an amplifier.

- Adapts a (1) RCA jack to (2) RCA jacks
- Connectors: (2) RCA Female to (1) RCA Male

Note: Does not create stereo sound

Item#	Description	RRP
80476	RCA Male To Dual RCA Female Adapter	£4.99

Pro-Audio .25in Male To .25in Male Cables

80387

Connect outputs from mixing consoles to recorders and amplifiers with unbalanced inputs

Pro-Audio Cables from Cables To Go are perfect for connecting line or mic level outputs from mixing consoles to recorders and amplifiers with unbalanced inputs. The Highly Flexible, 7mm PVC jacket reduces the risk of cables kinking and damaging the conductors. Bright nickel plating on solid brass connectors resists wear from reconfiguring and moving equipment from one venue to another. Spring strain relief on the plug reduces the effects of age on the solder joints and contacts.

- Pro-Audio cables are made from twisted-pair audio cable under an aluminium foil for maximum shielding from noise
- Connectors: .25in Plug to .25in Plug
- 22AWG twisted-pair construction
- Foil shield and 60% copper braid
- Nickel plated brass connectors

Pro-Audio XLR Male To XLR Female Cables

80376

Connect outputs from mixing consoles to recorders and amplifiers with balanced inputs

Pro-Audio Cables from Cables To Go are perfect for connecting line or mic level outputs from mixing consoles to recorders and amplifiers with balanced inputs. Highly flexible, 7mm PVC jacket reduces the risk of cables kinking and damaging the conductors. Bright nickel plating on solid brass connectors resists wear from reconfiguring and moving equipment from one venue to another. Chuck strain relief inside the XLR connector reduces the effects of age on the solder joints and contacts.

- Pro-Audio cables are made from twisted-pair audio cable under an aluminium foil for maximum shielding from noise
- Connectors: XLR Male to XLR Female
- 22AWG twisted-pair construction
- Foil shield and 60% copper braid
- Nickel plated brass connectors
