

## High Resolution SCART RGB Cable Connectivity

Supports composite and RGB video, stereo audio and digital signalling

The C2G Premium Gold Flat and Standard Round SCART cable series delivers a strong combination of performance and value. SCART digital compatible cables are precision engineered and manufactured utilising high quality cable construction and gold plated connector reliability. The C2G SCART Splitter solutions extends the connection abilities by allowing up to 5 Scart equipped devices to connect to a single Scart input. The SCART system provides simplified interconnection to a variety of SCART compatible audio/video equipment, including: TVs, VCRs, DVD players, game consoles and set-top boxes. The signals carried by SCART include both composite and RGB (with composite synchronisation) video, stereo audio input/output and digital signalling. These fully functional, high bandwidth cable and splitter solutions are tested to perform at industry standards and are backed by the following warranty: Cables - lifetime warranty; Adapters and Splitters - one-year warranty.

### Features:

- Gold plated connectors for improved signal clarity
- SCART Male to SCART Male cable connectorisation
- Supports automatic widescreen switching
- Complete pin-out connectorisation

### Applications:

- Perfect for high performance audio/video interconnects, including: TV's, set-top boxes, DVD players, projectors, game consoles
