

TruLink® 3-Play™ Component Video + TOSLINK® Digital Audio High Performance Selector Switch

Easy switching between devices with component video, stereo audio and TOSLINK digital audio!

The TruLink 3-Play selector connects up to three TOSLINK digital audio, three stereo analog audio pairs, and three component video (770.3) signals to a single component video output. Experience loss-less control from as many as three HDTV or progressive scan source components! With its compact size, 3-Play provides the power of choice and the convenience of control! This component is ideal for connecting video game systems, DBS Satellite, DVD and ATSC tuners to home theater receivers and pre-amp/processors. Includes wireless IR remote control, front panel selection, and a DC 12 V (500 mA) power supply.

Features:

- Standard Stereo RCA Connectors
- Easy Selection Illuminating Push-Button controls
- Slim Line Remote Control
