

## TruLink® Infrared (IR) Repeater Extension Kit

Extends infrared signals to operate electronic components

Does your entertainment system have wooden doors or would you like to mount your components in a cupboard? Without a clear line of sight, infrared (IR) signals from a remote control will not reach the equipment.

Our Remote Control Repeater Kit contains all equipment necessary to remotely operate four components (expandable to twelve components) using your standard remotes. Mount the IR receiver in a central location and connect to the IR Distribution Block. This block repeats the signals through emitters to your electronic components.

Your components may now be mounted in your entertainment center, cupboard or another room! The kit is self contained and easy to connect.

### Features:

- IR Receiver (Dimension: 44.6mm (L) x 15.4mm (W) x 12.2mm (H))
  - 3.0m cable is attached for connection to IR Repeater
  - IR receiver has blue LED to confirm receipt of IR signal
- IR Repeater Block (Dimension: 82.5mm (L) x 49.1mm (W) x 25.0mm (H))
  - Requires 12 VDC Universal (UK/EU) Power Adapter (adapter included)
- Emitters
  - Dual emitter "Y" Cable
  - Overall length is 3.0m; final 1.0m may be separated
