Mac® Compatible Mini DisplayPort™ Cables

Connect any Mini DisplayPort equipped device to another

Apple's latest iMac® computers and LED Cinema Displays utilise a new type of video connector called Mini DisplayPort. C2G now offers a full range of Mini DisplayPort cable cables and cable extender products that will allow you to attach your LED Cinema Display to any Mini DisplayPort equipped MacBook®, MacBook Pro®, MacBook Air®, Mac Pro®, iMac, or Mac Mini device.

You can also use these cables with any of our Mini DisplayPort to DVI adapter, Mini DisplayPort to HDMI® adapter, or Mini DisplayPort to VGA adapter for connection to any type of external display, projector, HDTV, or non-Apple monitor.

Features:

- High quality Shielded Twisted Pair (STP) construction for reliable service and performance
- Protective over-mould connector protection
- Apple® white colour coordination
- Capable of driving resolutions up to 2560x1600
- Connect directly to any Mini DisplayPort output connector
- Ultimate flexibility and reliability
- Minimizes cross talk and transmission errors
- Plug and play construction
- Lifetime warranty

Applications:

- Connect your 27-inch iMac as an external display with another Mini DisplayPort equipped device
- Perfect for home or office external monitor applications, including: Digital signage, classroom education applications, dual monitor office applications
