

USB 2.0 Aluminium HUB

Provides up to four or seven additional USB 2.0 ports to your PC or Mac®

The USB 2.0 HUB is a robust hardware solution that provides an easy and fast way to connect USB devices to your PC or Macintosh® computer. Up to seven high speed ports connect you to an almost limitless number of USB devices; including modems, scanners, printers, PC cameras, digital cameras, keyboards, telephones, and other high tech appliances. The hub's black anodized design provides an aesthetic complement for either desk or wall mount placement.

Connect to the hub for easy download and editing of your digital pictures, MP3s and video streams. Our hub supports self-power mode, and has built-in overcurrent protection. Each port handles up to 480 Mbps, and is fully plug and play, hot-swappable, and daisy-chainable up to 127 devices. Supported under Windows® and Mac®, our 7-port hub enables your laptop or desktop computer to multi-task with all your high speed USB 2.0 devices.

Features:

- Input: (1) 5V/3A Power Male
