

7-Port Cables To Go USB 2.0 HUB

Provides seven additional USB 2.0 ports to your PC or Mac®

The USB 2.0 HUB is a robust hardware solution that provides an easy and fast way to connect USB devices to your PC or Macintosh® computer. Seven high speed ports connect you to an almost limitless number of USB devices; including modems, scanners, printers, PC cameras, digital cameras, keyboards, telephones, and other high tech appliances. The hub's design is specifically a space-saving function and multi-connection convenience.

Connect to the hub for easy download and editing of your digital pictures, MP3s and video streams. Our hub supports self-power mode, and has built-in overcurrent protection. Each port handles up to 480Mbps, and is fully plug and play, hot-swappable, and daisy-chainable up to 127 devices. Supported under Windows® and Mac®, our 7-port hub enables your laptop or desktop computer to multi-task with all your high speed USB 2.0 devices.

Features:

- Input: (1) 5V/3A Power Male and (1) USB Type B Female Connection
- Output: (7) USB Type A Female Connections

Applications:

- Connect up to seven additional external devices
- Perfect for all home or office USB enabled device applications, including: retail/business, digital signage, classroom/education or medical/healthcare applications
