

## Serial Attached SCSI Cables

Next generation SCSI based interface standard

Serial Attached SCSI (SAS) is the next generation storage solution for your business. SAS integrates two established technologies, combining proven utility, reliability and performance attributes of the SCSI protocol with the performance advantages of a serial architecture. SAS solutions accommodate both low cost bulk storage (ATA), and performance and reliability in mission critical applications (SCSI). SAS is the next generation interface standard for SCSI-based systems, designed to replace the SCSI parallel interface with much faster, more flexible, 6Gbps Serial Interface while maintaining the robust nature of the SCSI Command Set. To support this next generation of storage solutions, we just launched a full assortment of 32-pin serial attached SCSI cables.

### Features:

- 32-pin connector
- Lifetime warranty
- RoHS compliant

### Applications:

- Perfect for: help desks, office buildings, and corporate data centers
- Replacement for parallel SCSI
- System level configuration in workstations, blade/storage servers, host bus adapters, tape storage, hard drives, etc.

Item#	Description
81805	0.5m SAS 32-PIN TO SAS 32-PIN RIBBON
81806	0.5m SAS 32-PIN TO SAS 32-PIN
81807	1m SAS 32-PIN TO SAS 32-PIN
81810	0.5m SAS 32-PIN TO 4 SATA
81811	1m SAS 32-PIN TO 4 SATA
81812	0.5m SAS 32-PIN TO 4 eSATA
81813	1m SAS 32-PIN TO 4 eSATA
81814	0.5m SAS 32-PIN TO 4 SATA 22-PIN+4-PIN
81815	1m SAS 32-PIN TO 4 SATA 22-PIN+4-PIN
