

## TruLink® HDMI® over Cat5e Extender

1080p and HDCP™ Compatible — Extend your HDMI signal up to 60 metres over Cat5!

The TruLink HDMI over Cat5e Extender is a robust solution that extends your HDMI signal up to 60 metres over two Cat5 UTP patch cables. This solution is ideal for applications where your HDMI monitor needs to be placed further than the average 10 metre HDMI cable limitation. Driving an HDMI signal over Cat5 allows you to take advantage of your UTP cable infrastructure already installed for a cost effective and reliable in-wall installation.

This HDMI over Cat5e solution is ideal for applications where you need to place your HDMI compatible screen in a remote location. This is common in large home installations or in digital signage applications, and is typical in retail stores, houses of worship, classrooms, and boardrooms where you need video presentation in one room but want the source to be out of sight and in a safe and secure environment.

### Features:

- Extend your digital video signal up to 60 metres (200 feet)
- Cat5e UTP cabling enables easy and cost effective in-wall installation
- Supports HDCP
- Video Bandwidth: 4.95Gbps
- HDMI with deep color, x.v. color™, high speed refresh rates, and lossless multi-channel surround sound
- Adjustable equalization
- Wall mountable
- No software required
- Free technical support and one year warranty

### Applications:

- Perfect for home or office HDMI extender applications, including: home theatre, gaming, video production and digital signage
