

TruLink® TOSLINK® Digital Audio Selector Switch

Connect three optical components to one unit with this easy to use locking rotary switch

The TruLink® TOSLINK® selector will increase your flexibility by adding up to three sources to your home theatre system's optical digital audio input. This selector features high integrity TOSLINK jacks to optimally transfer light signals and prevent the wear and tear on your TOSLINK cables that comes from manually connecting and reconnecting cables. Additionally, the compact size of this switch allows you to put it almost anywhere.

Great for DVD players, game consoles, audio CD recorders, CD players, Mini Disc, DAT, sound cards, receivers and decoders.

Features:

- Standard optical ports
- Compact size
- Large locking rotary switch
- Input: (3) TOSLINK Optical Female
- Output: (1) TOSLINK Optical Female
- No software required
- Free technical support and one year warranty

Applications:

Perfect for home or office digital audio switch applications, including: home theatre, gaming and video production
