

## TruLink® DVI Over Cat5 Extender

Extend your DVI-D signal up to 50 metres over Cat5

The TruLink DVI over Cat5 Extender is a brilliant solution that extends your DVI signal up to 50 metres over two Cat5e UTP patch cables. This solution is ideal for applications where your DVI monitor needs to be placed further than the average 20 metre DVI cable limitation. Driving a DVI signal over Cat5 allows you to take advantage of your existing UTP cable infrastructure for a cost-effective and reliable in-wall installation.

This DVI over Cat5 solution is ideal for applications where you need to place your computer in a remote location. This is common in digital signage applications typically found in retail stores, places of worship, classrooms and boardrooms, where you need video presentation in one room but want the computer to be out of sight and in a safe and secure environment. 1080i resolution; HDCP™ compatible.

### Features:

- Extend your DVI signal up to 50 metres
- Cat5 is a cost effective replacement for long DVI cables
- Allows computer to be placed in a safe, secure remote location
- Base Unit Connectors: One DVI-Female and One RJ45 Female
