Operational Manual

Multi-Function Converter w/CATV Tuner & PIP

Converts a CRT or LCD computer monitor to a television set

Model: 40972

Thank you for purchasing the Multi-Function Converter w/CATV Tuner & PIP. We hope that you will be pleased with the functionality and capabilities that this converter offers. **We recommend that you read this manual thoroughly and retain for future reference.**

Function:

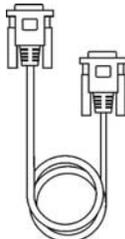

The imaging method of a CRT or LCD monitor is quite different from a television set. CRTs and LCDs utilize non-interlace scanning to form an image on the screen while the TV uses interlaced scanning. It becomes apparent that an LCD or CRT monitor is better for long time viewing and the CRT or LCD has higher resolution than a TV. Traditional television sets have limited resolution (Horizontal Lines) and CRT or LCDs generally have more than two to three times the resolution. The Multi-Function Converter turns your CRT or LCD into a second TV with higher picture quality and stability for DVD, VCR, Video Games and television viewing.

Package Contents

Before connecting your devices, please make sure that the package contents include the following accessories:

Remote Control

VGA Cable

3.5mm
Audio Cable

AC/DC
Adapter

Base

AAA Batteries

Features:

- Plug 'n' Play: No software required
- Full Channel Selection for CATV up to channel 125
- 4 output resolutions, 1024X768, 800X600, 640X480, 852X480 (Mac)
- Stylish Design, can place upright (stand included) or horizontal
- Full-function remote control
- Front panel AV and S-Video inputs; Rear panel VGA in/out and 3.5mm audio in/out
- Adjustable TV function: brightness, hue, color, etc.
- Auto-Scan channel programming
- MTS Stereo for a true theater like experience

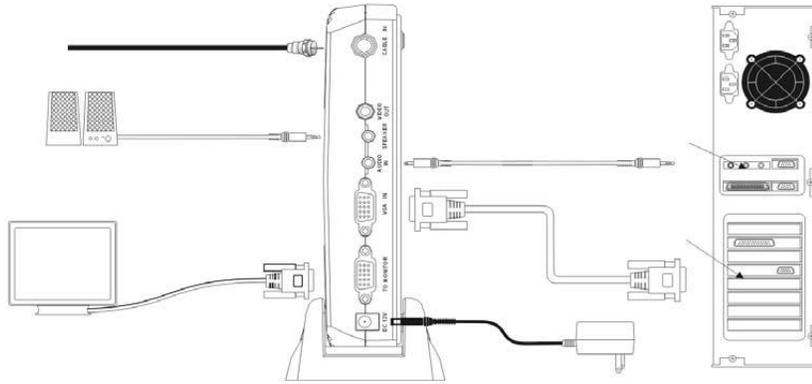

Connecting the Converter:

To connect to a PC:

1. Place your Multi-Function Video Converter near the monitor.
2. Connect the CATV cable to the "CABLE IN" jack on the back panel.
3. Connect the monitor's VGA cable to the "TO MONITOR" jack on the back panel. Tighten the screws as a loose connection will cause picture distortion.
4. Connect your multimedia (computer) speaker (**please note the connector should be 3.5mm male stereo type**) to "SPEAKER" on the back panel.
5. Connect the supplied 3.5mm audio cable to the speaker output of your PC sound card and the opposite end to the "AUDIO IN" on the back panel.
6. Connect the supplied AC/DC adapter to "DC 12V" on the back panel and then plug into a standard 110~120Volt receptacle. **NOTE: Using a differently rated adapter may result in damage to the unit, risk of electrical shock and possible fire.**
7. Turn on your monitor and then push the "POWER" button on the Multi-Function Converter. You should have a TV image on your LCD or CRT screen. Turn off the Multi-Function converter and your computer should be displayed.

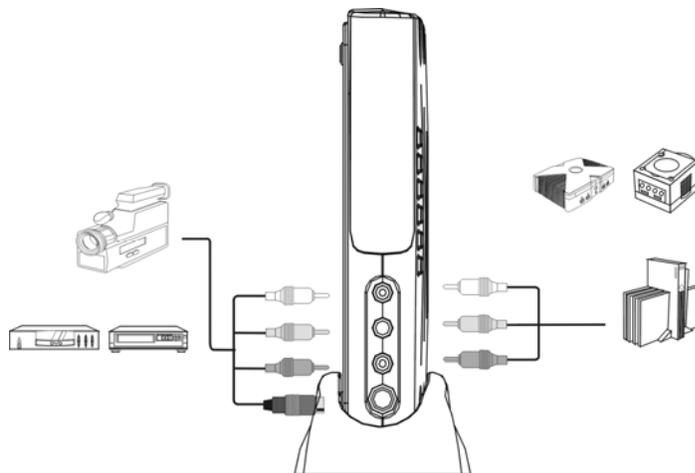

To connect a source device –

If your video source has a composite video output, follow these steps:

1. Connect the 3-RCA patch cable to the output of your; game, DVD, VCR, etc. (pay special attention to color coding; YELLOW for video, WHITE for left audio and RED for right audio).
2. Connect the other end of RCA patch cable to the “Video/Audio Input” on the front panel of Multi-Function Converter (paying attention to color coding).

If your video source has a S-Video output, follow these steps:

1. Connect the S-Video and 2-RCA patch cable to the output of your; game, DVD, VCR, etc. (pay special attention to connector orientation and color coding; WHITE for left audio and RED for right audio).
2. Connect the S-Video patch cable to the S-Video input and the 2-RCA patch cable to the “AUDIO” on the Multi-Function Converter (pay special attention to connector orientation and color code).
